

Finland-Germany exchange

The journey began on 16th of november 2018, when the finish students arrived at the Munich airport. After finding our exchange partners we returned back home. The first weekend was organized by ourselves, so we could do whatever our exchange partners wanted to see. The English Garden and the Olympiapark were the most famous aims. On monday they visited our school, saying it was quite different than theirs. That, we can totally confirm, arriving at their school after our flight to Helsinki five months later. Not only the building looked unusual for a school, but the rules were something we had to get used to, too. As an example, it was common to use your cellphone or to take off your shoes before entering a classroom. But enough from school! Obviously we did a trip through Helsinki to get to know the city. We stopped at several sights to explore the city. Helsinki is located near the sea, so we had a great view over the harbour and the water. The cathedral in the middle of the town was the highlight, because up there you could see over the city. After the tour, some of us met at the seaport and took a walk along the beach. You could borrow bikes nearly at every corner of Helsinki to explore the city easier, which we did too! We got on well together, although we come from different countries. On the weekend the Finnish exchange partners organized a boat trip. It was very interesting seeing Helsinki from another perspective.

This was a nice last day! Although we were all quite exhausted from this exciting week, we really enjoyed the trip to Finland and wouldn't hesitate to do it again!
